3. Create role named «junior_dev» with login privilege and some password.
4. Create a view that shows the average and total orders for each salesman with his or her name.
5. Create a view that shows the number of orders in each city.
Grant all privileges to «junior_dev»
6. Create a view that shows all of the customers who have the lowest grade. Grant only select statements to «junior_dev»
7. Create a view that shows the number of the salesman for each grade.
8. Create a view that shows each salesman with more than one order.
9. Create role «intern» and assign all objects of «junior_dev» to «intern».
